“Collecting Campus Climate Data”

Collecting Data

- What type of data do you want to collect?
 - Depends on your research question
- Quantitative data is best at explaining the outcomes and results of an event or experience
- Qualitative data is best at explaining the meaning or significance of an event or experience
- What types of data are you already collecting?
 - How can this data be used to examine or address equity gaps in student and employee experiences and outcomes?

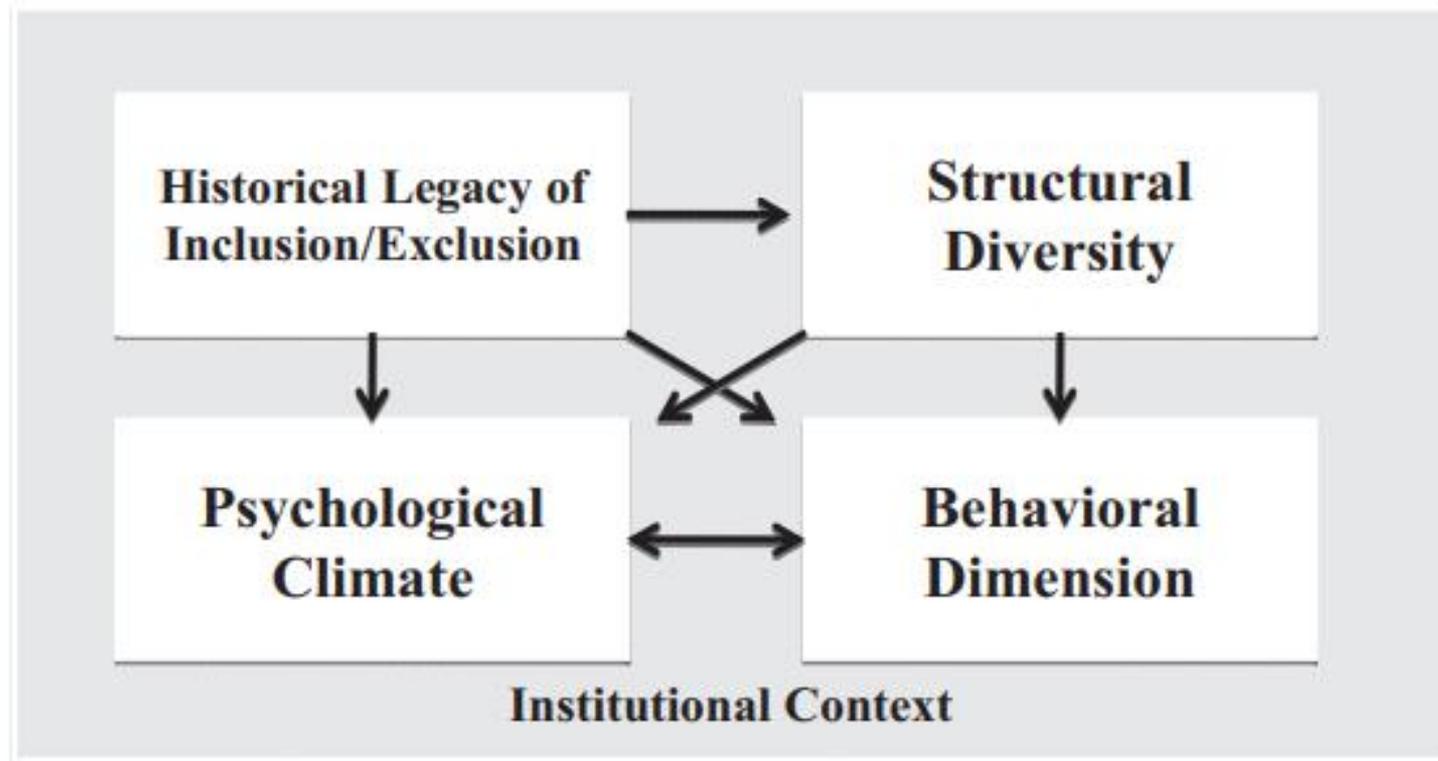

Campus Climate Overview

- An environmental factor of our campus with behavioral, psychological, historical, and compositional dimensions that affect educational and occupational outcomes
- **Historical Legacy of Inclusion** – previous institutional missions, policies, and procedures
- **Compositional Diversity** – demographics of students, faculty, and staff
- **Psychological Dimension** – perceptions and attitudes related to prejudice and discrimination
- **Behavioral Dimension** – social interaction and campus involvement, current practices

Collecting Campus Climate Data

Government/Policy Context

Sociohistorical Context

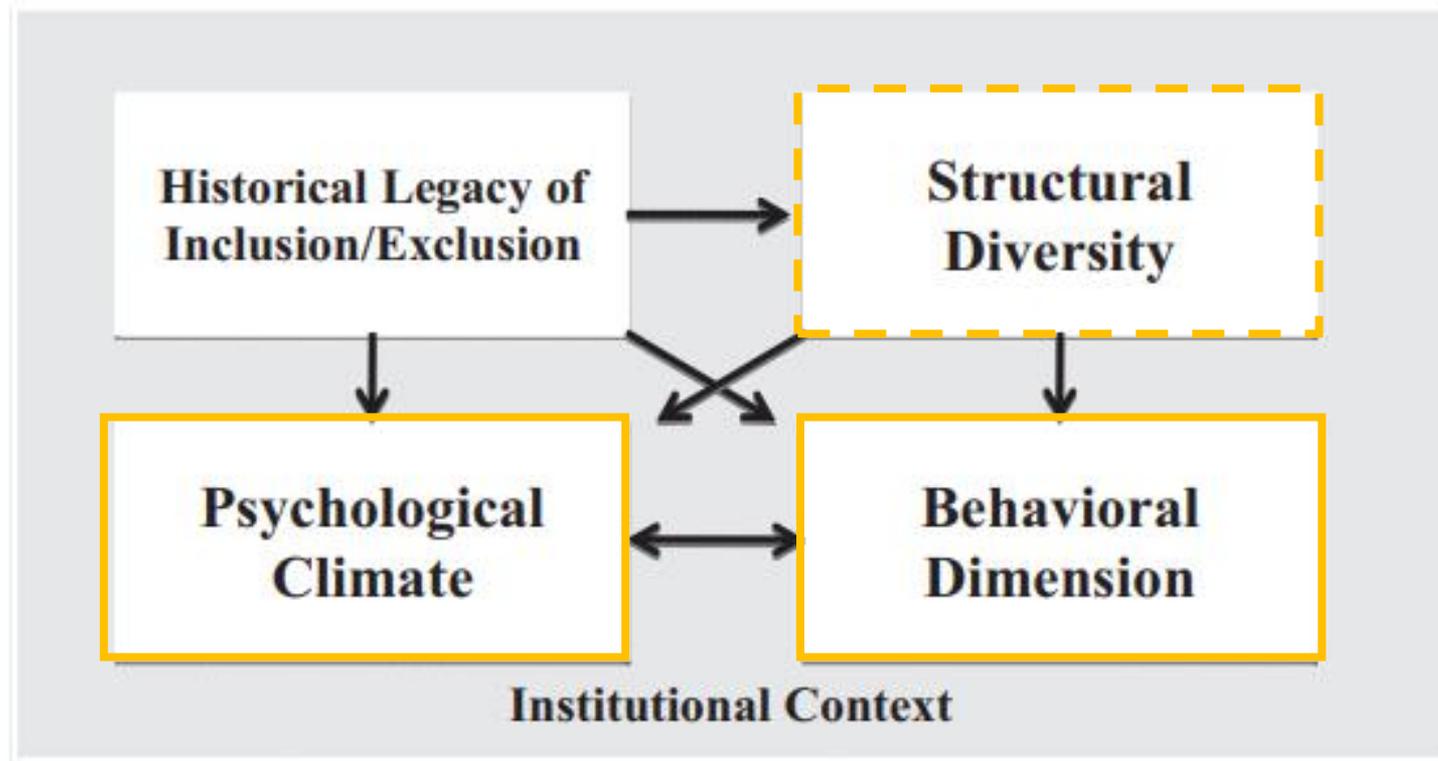

(Hurtado, Milem, Clayton-Pedersen, & Allen, 1999)

Collecting Campus Climate Data

Government/Policy Context

Sociohistorical Context

(Hurtado, Milem, Clayton-Pedersen, & Allen, 1999)

Organizational/Structural Dimension

- A microcosmic version of the sociohistorical context and a short-term version of the historical legacy, mixed with a more implicit version of the behavioral and psychological dimensions
- Reflects objective rather than perceived climate
- Diversity of campus curriculum and activities
- Decision-making practices for budgeting, staffing, promotion/merit, and admissions
- Other structures and processes that guide daily business

Subjective Campus Climate Proxies

- Personal experiences and observations
 - “Have you ever been harassed or discriminated against?”
- Perceptions of environment and its aspects
 - “Do you believe you can present your whole, authentic self to your peers, colleagues, department, etc.?”
- Beliefs about or responses to institutional actions and policies
 - “Does this university promote the appreciation of cultural differences?”

Objective Campus Climate Proxies

- Personnel demographics and representation
- Student and employee outcomes
- Availability of culturally-competent curriculum, activities, and events
- Presence of affinity groups or clubs
- Retention, withdrawal, and separation rates
- Campus initiatives and goals
- Can you think of other examples among the data you collect or are aware of?
